Technical Skills

Languages: Java (primary), SQL, JavaScript, C++

Backend: Spring Boot, Spring Security (JWT, RBAC), REST APIs, Apache Kafka, Redis, WebSockets

Frontend: React, Vite, HTML5, CSS3, Tailwind CSS

Databases & Cloud: MySQL, Firebase Realtime Database, AWS (EC2, RDS, S3, CloudFront), Docker

DevOps & Tools: Git, GitHub Actions (CI/CD), JMeter, Postman

Experience

9X IT Solutions

Software Engineer Intern

Hyderabad
Oct 2025 – Mar 2026

- Migrated Spring Boot REST APIs from session-based authentication to **stateless JWT**, reconfiguring Spring Security for token validation on protected requests.
- Centralized user, moderator, and admin **RBAC** in Spring Security authorization rules, eliminating duplicated controller-level access checks.
- Optimized Admin Dashboard queries with **DTO projections** to fetch only response-required fields, reducing API response payload size by **23%**.
- Added **pagination** to the admin user API to cap records returned per request and avoid loading the full user dataset.
- Analyzed MySQL **EXPLAIN** plans and benchmarked updated APIs with **JMeter**, reducing average response time by **~25%** and increasing throughput by **~20%**.

Projects

OpsPilot-AI – Incident Response Platform | [GitHub](#) | [Live](#)

Java | Spring Boot | Apache Kafka | Redis | AWS | MySQL

- Implemented **23 Spring Boot REST endpoints** for incident lifecycle management with **RBAC** across Reporter, Responder, and Admin roles.
- Engineered **Redis cache-aside caching** for dashboard APIs and JWT revocation blacklisting, reducing repeated database reads by **86.9%** and average dashboard latency by **82%**.
- Load-tested **15,000 requests** against the dashboard APIs with **50 concurrent clients**, sustaining **288 requests/sec with zero failures**.
- Architected an **at-least-once Kafka notification pipeline** using a transactional MySQL outbox, retries, DLT handling, event deduplication, and WebSocket/STOMP delivery.
- Added **43 JUnit/Mockito tests** across authentication, RBAC, incident workflows, caching, SLA scheduling, and Kafka reliability; configured **GitHub Actions** for Docker builds and deployment to EC2, RDS, S3, and CloudFront.

BookMyTicket – Ticketing & Parking Validation App | [GitHub](#)

Java | Android | Firebase

- Developed an Android QR ticketing application supporting **3 user roles** (Tourist, Place Admin, Parking Admin), integrating Razorpay payments with one-time QR ticket validation.
- Designed a **Firebase Realtime Database** model for tickets, payments, visitor groups, parking records, payouts, and validation data across all three application roles.
- Implemented **idempotent payment processing** using Firebase Cloud Functions and Realtime Database transactions, preventing duplicate payments and repeated QR validation during retries.
- Integrated **ML Kit OCR** for vehicle registration extraction, achieving **93.0% exact-match accuracy** across 500 labeled plate images.

Education

Saveetha School of Engineering | Chennai, India

June 2026

B.E., Computer Science and Engineering – CGPA: 8.5/10

Krishnaveni Junior College | Kothagudem, India

May 2022

Intermediate (MPC) – CGPA: 9.4/10

Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Object-Oriented Programming.

Certifications & Achievements

- Oracle Certified Java SE 17 Developer (1Z0-829)** | [Credential](#)
- AWS Certified Cloud Practitioner** | [Credential](#)
- YuKeSong2025 (Devpost)** – Winner, International Hackathon | [Certificate](#)
- Adobe India Hackathon (Adobe)** – Finalist | [Certificate](#)
